

Application for IT Support Position at ABC Technologies

Dear Hiring Manager,

I am eager to join ABC Technologies as a working student in IT support, bringing my technical skills and passion for innovation. As a master's student in Applied Computer Science at SRH Hochschule Heidelberg, specializing in Business Computing, I have a strong foundation in SAP ABAP, HANA, and software development, which I am keen to apply in a dynamic IT department. My understanding of user hardware, network troubleshooting, and technical documentation, along with my clear concepts and clean coding skills in Python, JavaScript, HTML, CSS, and Java, make me a strong candidate for this role.

In my previous role as a Frontend Developer intern, I developed user-friendly interfaces while collaborating effectively with cross-functional teams. This experience honed my problem-solving skills and flexibility in adapting to project demands. Additionally, I have gained practical experience through internships at Education4ol, where I developed a website for dairy products, and at LetsGrowMore, where I built a gym management system using React.JS. These experiences solidified my expertise in web development, particularly in HTML, CSS, and JavaScript.

Beyond my formal education, I have pursued courses in Artificial Intelligence, Machine Learning, Microsoft Azure, Google Analytics, and full-stack Python web development. I've also completed workshops in WordPress, React JS, and R Programming, which expanded my knowledge of UI/UX design and data analysis.

During my master's program, I undertook academic projects using various technologies, including Java, Spring, React, Angular, and Node.js. I thrive in Agile environments and am adept at managing individual tasks with responsibility and independence. My business-fluent English and intermediate German, coupled with my team-oriented mindset, make me an asset to any organization.

I am excited about the opportunity to contribute to your team, grow my skills, and expand my knowledge further. I look forward to discussing how I can contribute to ABC Technologies in more detail.

Sincerely,

Ketan Darekar
