Application for Software Development Position at Lehmann + Pioneers Digital GmbH

Dear Hiring Manager,

I am writing to express my interest in the Application Development role at Lehmann + Pioneers Digital GmbH. As a master's student in Applied Computer Science at SRH Hochschule Heidelberg with a core specialization in Business Computing, I bring a blend of technical knowledge and hands-on experience in software development and UI design. My solid understanding of SAP ABAP, HANA, and web technologies, combined with my passion for innovation, makes me a strong candidate for your team.

During my internship at Education4oI, I developed a Dairy Products website using HTML, CSS, JavaScript, and Bootstrap, which gave me valuable insights into the professional web development process. This experience strengthened my skills in version control systems like GitHub and taught me how to effectively collaborate within a team. I later enhanced my front-end development skills at LetsGrowMore, where I created a sample gym management system using React.JS. These internships solidified my expertise across various languages, including Python, JavaScript, and React.JS, while reinforcing my problem-solving abilities.

Throughout my master's studies, I have also worked on academic projects using technologies like Java, Spring, Angular, Node.js, and Google Cloud. My practical knowledge is further complemented by certifications in AI, Machine Learning, Microsoft Azure, and full-stack Python development. Additionally, I have completed workshops in WordPress, React JS, and R Programming, further enhancing my UI design and data analysis capabilities.

I am eager to continue developing my technical skills in an innovative environment like yours. With business-fluent English, intermediate German, and a passion for learning cutting-edge technologies, I am confident that I can contribute effectively to your team. I would welcome the opportunity to discuss how my skills and experience align with your needs.

Sincerely,

Ketan Darekar
