Application for Web Development Internship Position at BASF

Dear Hiring Manager,

I am thrilled to apply for the internship opportunity in the Performance Materials division at BASF. As a Master of Science student specializing in Applied Computer Science at SRH Hochschule Heidelberg, I have developed strong technical skills in front-end development, aligning perfectly with your requirements for experience in Angular. My solid foundation in HTML, CSS, JavaScript, and Bootstrap has been honed through practical work and internships, which allowed me to design user-friendly interfaces and collaborate on software development projects.

During my time as a Frontend Developer intern, I worked on various web development projects, including designing a user interface for a Dairy Products website. This experience not only strengthened my expertise in front-end technologies but also fostered my ability to visualize and execute efficient user interfaces. I am confident that my problem-solving skills, technical documentation abilities, and passion for innovation would allow me to contribute positively to your team.

Beyond this, I have gained hands-on experience in SAP ABAP and HANA through my coursework. I have further broadened my technical expertise with languages like Python, Java, and React, making me well-versed in object-oriented programming and database management. I have successfully completed academic projects and internships focused on web development, database concepts, and cloud computing technologies, further deepening my understanding of agile development.

With business-fluent English and intermediate German, combined with my proactive attitude, I am confident that I can bring value to your team. I would welcome the opportunity to contribute to your innovative projects and learn from the experts at BASF. I am eager to further discuss how my skills and experiences align with your needs.

Thank you for considering my application. I look forward to the opportunity to speak with you.

Sincerely,

Ketan Darekar
