Application for IT Internship Position at Invenio

Dear Hiring Manager,

I am thrilled to apply for the IT internship at Invenio Group, an award-winning company renowned for its innovative software solutions and mechanical engineering expertise. With my current pursuit of a Master of Science in Applied Computer Science from SRH Hochschule Heidelberg and hands-on experience in software and web development, I believe I am well-suited for this role.

During my Frontend Developer internship, I developed user-friendly interfaces using HTML5, CSS, JavaScript, and PHP, and gained practical experience in web application development and GUI design. My role also involved using mockup tools and MySQL for data management, which strengthened my problem-solving skills and passion for innovation. I am confident that my technical expertise, along with my ability to work effectively within teams, makes me a strong fit for your IT internship.

I have also pursued internships at Education4ol and LetsGrowMore, where I developed websites for various industries, including dairy products and gym management systems. These experiences allowed me to deepen my expertise in languages such as React.JS, Python, and JavaScript. Additionally, I have completed several courses in Artificial Intelligence, Machine Learning, Microsoft Azure, and full-stack Python development.

Throughout my Master's studies, I have worked on projects using technologies like Java, Spring, Angular, Node.js, SQL, and Google Cloud. I am eager to learn new tools, particularly in DevOps, and thrive in Agile team environments. My fluency in English and intermediate German further enhance my ability to contribute to your international team.

I am excited about the opportunity to bring my technical skills and passion for software development to Invenio Group. Thank you for considering my application—I look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Ketan Darekar
