

Application for IT Working Student Position at 3st kommunikation.

Dear Hiring Manager,

I am thrilled to apply for the Working Student role in Web Development at 3st kommunikation, a company known for its creative and integrated approach to corporate communication. With my ongoing Master of Science degree in Applied Computer Science at SRH Hochschule Heidelberg, specializing in Business Computing (SAP ABAP and HANA), and my hands-on experience in web development, I am confident in my ability to contribute effectively to your team.

During my internship as a Frontend Developer, I supported the conception, planning, and implementation of websites using technologies such as HTML, CSS, PHP, JavaScript, and WordPress. This role allowed me to strengthen my problem-solving skills and work independently, skills I'm eager to bring to 3st kommunikation. My clear concepts and clean coding practices in Python, JavaScript, and Java, along with a solid grasp of database management, make me well-prepared for the technical demands of this position.

In addition to my studies, I've pursued real-world experience through internships at Education4ol and LetsGrowMore, where I developed websites for a variety of clients, including a gym management system. These experiences sharpened my expertise in HTML, CSS, and React.JS. I have also completed courses in Artificial Intelligence, Machine Learning, Microsoft Azure, and full-stack Python web development. Workshops in WordPress, React.JS, and R Programming have further enhanced my ability to create user-friendly interfaces and analyze complex data.

With strong communication skills, a passion for learning new tools and technologies, and experience working in Agile teams, I believe I can make a valuable contribution to your team. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Ketan Darekar
