Application for Software Development Position at Finanzen.net GmbH

Dear Hiring Manager,

I am excited to apply for the Software Development role at finanzen.net. Your mission to simplify investment decisions for millions of users deeply resonates with me, and I am eager to contribute to the expansion and internationalization of your platforms.

I am currently pursuing my Master of Science in Applied Computer Science at SRH Hochschule Heidelberg, specializing in Business Computing with a focus on SAP ABAP and HANA. Throughout my academic journey, I have developed strong skills in Python, JavaScript, HTML, CSS, and object-oriented programming in Java. My understanding of database concepts and software development aligns well with the requirements for this position.

During my internships, I gained hands-on experience in web development. I developed user-friendly interfaces for a Dairy Products website using HTML5, CSS, JavaScript, and Bootstrap. I further expanded my skills by working on a gym management system using React.JS, which sharpened my knowledge of modern web development practices. Additionally, I am familiar with SQL databases and REST APIs, which will be valuable in this role.

Beyond classroom learning, I have pursued several courses in Artificial Intelligence, Machine Learning, and Microsoft Azure, and completed workshops on React JS and WordPress. These experiences have strengthened my technical foundation and ability to adapt to new tools.

With business-fluent English and intermediate German, I am confident in my ability to collaborate effectively in an Agile environment. I am eager to bring my problem-solving skills, teamwork, and strong work ethic to finanzen.net.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team

Sincerely,

Ketan Darekar
