Application for IT Quality Position at Porsche

Dear Hiring Manager,

I am excited about the opportunity to bring my unique blend of skills and experience to a dynamic and innovative company like Porsche. My background in both information technology and business administration, paired with a deep interest in agile methods such as Scrum, aligns well with your specified requirements.

Currently, I am pursuing my Master of Science degree in Applied Computer Science at SRH Hochschule Heidelberg University, specializing in Business Computing with a focus on SAP ABAP and HANA. My proficiency in Python, JavaScript, HTML, CSS, and object-oriented programming, along with my strong understanding of database concepts, makes me confident that I would be a great fit for your team.

During my internships at Education4ol and LetsGrowMore, I developed websites using HTML, CSS, React.JS, and gained real-world experience in web development. I also honed my communication skills, teamwork, and problem-solving abilities. Additionally, my knowledge in tools such as Confluence, JIRA, and Microsoft 365 further enhances my ability to contribute to Porsche's digital solutions.

To complement my academic learning, I pursued certifications in Artificial Intelligence, Machine Learning, Google Analytics, Microsoft Azure, and Python full-stack development. I also completed workshops in WordPress, React, and R Programming, which helped me improve my web development and data analysis skills.

I am a fast learner with business-fluent English and intermediate German skills. I thrive in Agile teams and am eager to contribute to Porsche's tradition of innovation. I look forward to the opportunity to discuss how I can add value to your team

Sincerely,

Ketan Darekar
