Application for IT Intern Position at BMI Group

Dear Hiring Manager,

I am excited about the opportunity to join BMI as an IT Intern, a role that aligns with both my academic background and previous experience. As a current Master of Science student in Applied Computer Science at SRH Hochschule Heidelberg, with a Bachelor's in Business Administration, I have developed strong analytical thinking and problem-solving skills—essential for tackling technical challenges and optimizing IT processes.

During my Frontend Developer internship, I independently managed smaller projects, utilizing HTML, CSS, JavaScript, and Bootstrap to design user-friendly interfaces. This experience sharpened my technical abilities and strengthened my motivation, flexibility, and teamwork—qualities that I believe make me a strong candidate for this position.

My internships at Education4ol and LetsGrowMore allowed me to apply my academic knowledge in real-world settings. I developed a website for dairy products at Education4ol, gaining a professional understanding of web development, and later created a gym management system during my time at LetsGrowMore. These experiences honed my expertise in various programming languages, including HTML, CSS, React.JS, and Python.

Additionally, I have pursued courses in Artificial Intelligence, Machine Learning, Microsoft Azure, and full-stack Python development. Workshops in WordPress, React.js, and R Programming further enhanced my skills in web development and data analysis.

I am comfortable working in Agile teams and taking responsibility for individual tasks. I am eager to learn new tools and cutting-edge technologies related to DevOps and software development. With my fluency in English, intermediate German, and passion for IT, I am confident in my ability to contribute positively to your team.

Thank you for your time and consideration. I look forward to the opportunity to discuss how I can support BMI and grow within your organization.

Sincerely,

Ketan Darekar
