Application for Front-End Development Position at Fraunhofer

Dear Hiring Manager,

I am writing to express my interest in the Working Student / Hiwi position in Front-End Development at Fraunhofer IOSB. Currently pursuing a Master's degree in Applied Computer Science at SRH Hochschule Heidelberg, with a specialization in Business Computing, I have developed strong technical and analytical skills that align well with this role.

During my internships, I gained hands-on experience in web development, creating user-friendly interfaces using HTML, CSS, JavaScript, and React. At Education4ol, I developed a website for dairy products, and at LetsGrowMore, I built a gym management system, further refining my front-end expertise. My academic projects in Java, Python, SQL, and cloud technologies have further solidified my foundation in software development.

In addition to my technical skills, I have completed various courses in AI, Machine Learning, Google Analytics, and Full Stack Development, enhancing my ability to approach complex problems with innovative solutions. I also have experience working in agile teams, and possess strong communication skills, with business-fluent English and intermediate German.

I am passionate about learning and contributing to cutting-edge technologies. I believe my technical expertise, combined with my proactive approach and teamwork skills, make me a strong candidate for this position. I would be thrilled to contribute to your team and look forward to the opportunity to discuss my application further.

Thank you for your time and consideration

Sincerely,

Ketan Darekar
