Application for Database Programming Position at SEW Eurodrive

Dear Hiring Manager,

I am writing to express my strong interest in the Database Developer position at SEW Eurodrive, which aligns perfectly with my academic background and hands-on experience. I am currently pursuing a Master of Science in Applied Computer Science from SRH Hochschule Heidelberg, specializing in Business Computing, with a focus on SAP ABAP and HANA. My Bachelor's degree in Business Administration has provided me with a solid foundation in both business informatics and computer science, equipping me to excel in roles that merge technology and business processes.

Through internships, I have gained valuable experience in software and web development. At Education4ol, I contributed to developing a website for dairy products, gaining a deep understanding of database systems and web technologies like Microsoft SQL, HTML, and CSS. Additionally, during my time at LetsGrowMore, I built a gym management system, further honing my skills in React.js, JavaScript, and front-end development. These experiences have strengthened my technical skills and fostered my ability to collaborate effectively within agile teams.

Throughout my academic journey, I have completed projects using technologies such as Java, Spring, Python, Angular, Node.js, SQL, and Google Cloud. I am highly motivated to learn new tools and technologies related to DevOps and database systems, and I am confident that my ability to adapt, innovate, and work efficiently under pressure will allow me to contribute meaningfully to SEW Eurodrive's development team.

With a proactive approach, business-fluent English, and intermediate German language skills, I am excited about the opportunity to bring my skills and passion for development to SEW Eurodrive. I would be delighted to discuss my qualifications further and explore how I can contribute to your team.

Thank you for your time and consideration

Sincerely,

Ketan Darekar
