Application for UX/UI Developer Position at SAP

Dear Hiring Manager,

I am very excited to apply for the internship position on your MTT Strategy & Innovation Team at SAP. My past experiences as a Frontend Developer intern, where I honed my skills in HTML, CSS, JavaScript, and Bootstrap, align perfectly with your role requirements.

Currently, I am pursuing my Master of Science degree in Applied Computer Science from SRH Hochschule Heidelberg, specializing in Business Computing, which includes SAP ABAP and HANA. I am eager for this position to gain valuable knowledge and experience in software development. My strong grasp of coding principles in Python, JavaScript, HTML, and CSS, along with object-oriented programming in Java, makes me a suitable candidate for your team.

During my first internship at Education4ol, I developed a website for dairy products, allowing me to understand web development from a professional perspective. I later interned at LetsGrowMore, where I created a gym management system website, solidifying my expertise in various languages, including React.js. To supplement my studies, I completed courses in Artificial Intelligence, Machine Learning, Google Analytics, and full-stack web development.

I am comfortable working in Agile teams and excel at taking responsibility for tasks. My fluency in English, along with intermediate German skills, complements my ability to communicate effectively. I am a quick learner with a goal-oriented mindset, eager to contribute positively to SAP's innovative projects and culture of breakthroughs.

I hope my CV provides a good first impression of my capabilities.

Sincerely,
Ketan Darekar
