Application for Web Developer Intern Position at Apiron Group

Dear Hiring Manager,

I am thrilled to apply for the Web Developer Intern position at Apiron. Currently, I am pursuing my Master of Science degree in Applied Computer Science at SRH Hochschule Heidelberg, specializing in Business Computing with a focus on SAP ABAP and HANA. I am eager to leverage my academic background and real-world experience to contribute to your team and gain further knowledge in software development.

During my previous internships, I enhanced my skills in front-end development, working with technologies such as HTML, CSS, JavaScript, Bootstrap, and React.JS. At Education4ol, I developed a user-friendly interface for a Dairy Products website, which helped me understand the critical aspects of web development, including teamwork, communication, and problem-solving. At LetsGrowMore, I created a gym management system and a registration form, further solidifying my expertise in front-end languages and frameworks.

In addition to my hands-on experience, I have completed several courses in Artificial Intelligence, Machine Learning, Google Analytics, Microsoft Azure, and full-stack web development using Python. My academic projects have allowed me to work with a variety of technologies, including Java, Spring, Angular, Node.js, SQL, and Google Cloud, and I am always excited to learn new tools and technologies, particularly in DevOps.

I am comfortable working in Agile teams and enjoy taking responsibility for individual tasks. With strong verbal and written English, intermediate German skills, and a passion for design thinking, I believe I can contribute effectively to your team. I look forward to the opportunity to bring my skills and enthusiasm to Apiron

Thank you for considering my application.

Sincerely,

Ketan Darekar
