Application for SAP Fiori Developer Position at Global Digital Services, BASF

Dear Hiring Manager,

I am excited to apply for the SAP Fiori Developer position at BASF. I hold a Master of Science in Applied Computer Science from SRH Hochschule Heidelberg, specializing in Business Computing with a focus on SAP ABAP and HANA. My academic background, along with practical experience as a Frontend Developer intern, aligns well with your team's needs.

In my previous internship, I developed user interfaces using HTML, CSS, JavaScript, and Bootstrap, gaining valuable hands-on experience in creating intuitive, user-centered applications. I have also worked with various full-stack technologies such as React, Node.js, and SQL, equipping me with the skills necessary to develop and enhance SAP Fiori applications effectively.

Beyond my development experience, I've had the opportunity to work in Agile environments where I strengthened my skills in project management and self-organization. I am comfortable taking ownership of tasks while collaborating within a team to deliver efficient solutions. Additionally, I've completed several certifications in Artificial Intelligence, Machine Learning, and cloud platforms like Microsoft Azure and Google Cloud, which have broadened my technical knowledge and problem-solving abilities.

My business-fluent English and intermediate German allow me to communicate effectively with global teams and stakeholders, ensuring smooth collaboration across borders. I am also passionate about continuous learning and staying updated with the latest digital solutions.

I am eager to bring my experience in SAP technologies and front-end development to the Global Digital Services team at BASF and contribute to building innovative digital tools that drive efficiency.

Thank you for considering my application. I look forward to the opportunity to discuss how I can add value to your team.

Sincerely,

Ketan Darekar
