Application for UX/UI Designer Position at Sovanta AG

Dear Hiring Manager,

I am currently pursuing a Master of Science in Applied Computer Science at SRH Hochschule Heidelberg, specializing in Business Computing. I am writing to express my interest in the User Experience Designer position at sovanta AG. I believe my educational background and practical experience align well with the role's requirements.

My studies have equipped me with a strong foundation in programming languages such as Python, JavaScript, HTML, and CSS, as well as Object-Oriented programming concepts in Java and database management. I have completed projects using technologies like React, Angular, and Node.js, which have enhanced my software development skills and fueled my passion for user-centered design.

My internships have provided valuable real-world experience. At Education4ol, I developed a website for dairy products, gaining insights into creating user-friendly interfaces. Additionally, at LetsGrowMore, I designed a gym management system website and a registration form, further solidifying my expertise in HTML, CSS, and React.

I have actively pursued courses in Artificial Intelligence, Machine Learning, Google Analytics, and full-stack web development, complemented by workshops in WordPress, React, and R programming. These experiences have equipped me to create visually appealing interfaces and analyze complex data.

Fluent in English and possessing intermediate German skills, I thrive in Agile team environments and excel in collaboration. I am eager to bring my innovative mindset to sovanta AG and contribute to diverse projects.

Thank you for considering my application for the User Experience Designer role. I look forward to the opportunity to discuss how I can add value to your team

Sincerely,

Ketan Darekar
