Application for IT Support Position at FIDUS

Dear Hiring Manager,

I am excited to apply for the Working Student IT position at FIDUS. As a Master of Science student in Applied Computer Science at SRH Hochschule Heidelberg, specializing in Business Computing, I have gained practical knowledge in software development, which aligns well with the role's requirements.

During my previous internships, I honed my technical skills and contributed to various projects. As a Frontend Developer intern at Education4ol, I developed a website for dairy products using HTML, CSS, and JavaScript, allowing me to refine my coding and user interface design skills. I further enhanced my abilities at LetsGrowMore, where I built a gym management system using React.js and CSS, gaining valuable experience in front-end development and collaboration.

In addition to hands-on experience, I have a solid academic foundation in programming languages such as Python, Java, and SQL. I have completed projects in Java, Spring, React, Angular, and Node.js, and I am eager to apply this knowledge in real-world scenarios. My courses in Artificial Intelligence, Machine Learning, and Microsoft Azure have also helped me develop a deep understanding of cutting-edge technologies, while my business informatics background equips me with a strong grasp of software's business applications.

I am fluent in English and have intermediate German language skills, and I work well in Agile teams, taking responsibility for individual tasks while contributing to group success. I am passionate about learning new technologies and have a can-do attitude that drives my goal-oriented approach.

I am confident that my skills, experience, and enthusiasm would allow me to make a positive contribution to your team. I would welcome the opportunity to discuss my qualifications further in an interview.

Sincerely,

Ketan Darekar
